### Decor

All decor pieces have to be fire resistant. A certificate has to be provided with backdrops. Otherwise we will conduct a fire test, hereby we will set fire to a small piece of your backdrop.

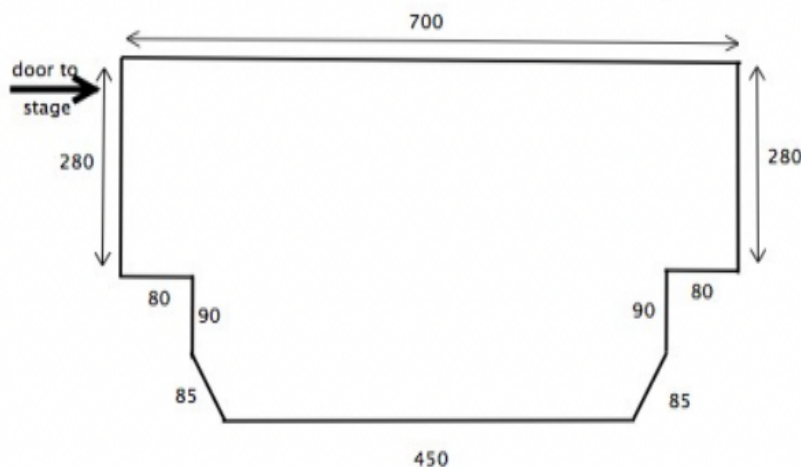

All décor pieces of wood, or other constructions that need to be flown into our trusses have to come with proper rigging material to hang it from our trusses.

All sorts of clamps and steels are available widely on the market to make the construction save. We do have the right to not fly your décor when we think it's not save to fly.

### Panama properties

Moving our barriers, posts, tables and/or chairs, for example, is not allowed. Use of this is only allowed in consultation with the club manager.

### Stage

### Special FX rules:

Using special fx is allowed in our club with the approval of our in-house technician. The use of confetti is allowed but this only applies if it is metallic confetti.

- The use of confetti, pyrotechnics C02 or other FX is only allowed after mutual satisfaction. When using pyro or C02 we ask for a risk assessment beforehand.  
*Paper confetti is NOT allowed*
- When using stage flames, a frame must be taped around where no one is allowed to stand We do not supply tape and the organizer will have to bring this himself.
- When using co2 cannons, this must be adjusted in a safe way so that no injuries can occur when firing the co2.
- The use of a bubble machine is not allowed.

**Stagehands:**

At a large show that requires more than 1 technician, this must be indicated at least 2 weeks before the show. When bringing your own technical crew, this must be indicated at least 1 week before the show.

**Emergency exits:**

All emergency exits and exit roads must always remain visible to the public. It is strictly forbidden to block these roads. If these emergency exits are blocked, the organizer must solve this immediately.

**DB-limit:**

we strictly use a dB limit of 103 dBA LAeq measured over 15 minutes at the FOH using a 10Eazy log system.

Our technician is allowed to maintain the dB level controlling the master bus, any discussion will lead in insertion of limiters in the main PA. Our technician is allowed to do this without consultation. If the artist is at the volume and it is louder than the allowed rule, measures will be taken immediately.

### **PRICES - (Standard package options)**

#### **Want to use the LED screen in Panama?**

- LED 4.00 x 2.00 €395.00 Ex. VAT.

>Your own visuals and logos can be loaded as standard. We are happy to discuss the possibilities!

- Separate lighting technician for light show (based on daily rate / max 10 hours) €500.00 Ex. VAT.

- Extra technical support (per hour), on top of the daily price €50,- Ex. VAT / per hour.

#### **Do you have live artists?**

If there are live performances with artists, you must notify us at least 14 days before your event. In the presence of live artists, as agreed in the agreement with Panama, an additional audio technician must be hired from us + additional materials needed for the riders. Please send us the riders in advance so that we can give you appropriate and good advice.

**Do you want advice or do you have questions please ask Luxonos;**
